SECURITY DOMAINS

- Enterprise Vulnerability Management
- Infrastructure, Application & Device Security
- Risk Prioritization & Findings Management
- Security Compliance & Configuration Assessment
- Security Reporting & Stakeholder Engagement

FRAMEWORKS

- ISO/IEC 27001
- NIST Cybersecurity Framework
- MITRE ATT&CK
- CIS Security Benchmarks Awareness

TECHNICAL SKILLS

- Operating Systems:** Linux, Windows
- Programming:** Python, Bash
- Vulnerability Management:** Vulnerability Scanning, CVSS Risk Prioritization, Findings Management, Remediation Tracking
- Security Assessment:** Infrastructure Security Assessment, Application Security Testing, Network Security Validation
- Tools:** Nessus, Nmap, Burp Suite, ELK Stack
- Networking:** TCP/IP, SNMP, SSH, HTTP/HTTPS

PROFESSIONAL SUMMARY

Senior Security Engineer with 5.6+ years of cybersecurity experience in vulnerability management, security assessments, and cyber risk reduction. Skilled in identifying, prioritizing, and tracking vulnerabilities across enterprise systems, applications, and connected assets. Experienced in remediation coordination, stakeholder engagement, security reporting, and Python-based security automation.

PROFESSIONAL EXPERIENCE

Senior Security Engineer | Volkswagen Group Digital Solutions [India]

May 2026 – Present | Pune

- Support enterprise vulnerability management by identifying, assessing, prioritizing, and tracking vulnerabilities across technology assets.
- Coordinate with infrastructure and application teams to drive remediation and reduce cyber exposure.
- Perform risk-based vulnerability analysis considering severity, exploitability, and business impact.
- Support incident response, threat management, and ISO 27001 internal audit activities.
- Develop security metrics, reports, and process improvements to enhance security posture.

Senior Consultant – Cybersecurity | LTIMindtree Ltd

Aug 2022 – Apr 2026 | Pune

- Performed security assessments across 500+ connected devices and enterprise environments to identify vulnerabilities and support remediation.
- Executed vulnerability lifecycle activities including validation, prioritization, reporting, and closure tracking.
- Conducted infrastructure, application, and network security assessments using Nessus, Burp Suite, and Nmap.
- Collaborated with engineering and client teams to communicate risks and drive remediation.
- Developed Python automation improving assessment efficiency by 40%.
- Mentored junior security professionals and guided vulnerability assessment activities.

Security Software Developer | DRDO (Contractual)

Feb 2021 – Aug 2022 | New Delhi

- Supported secure development and deployment of mission-critical software aligned with security requirements and ISO 27001 controls.
- Contributed to risk assessment, secure configuration validation, and compliance documentation.

CERTIFICATIONS

- Microsoft AI-900 (2024)
- MITRE ATT&CK (2022)
- IIIT Bangalore Cybersecurity

EDUCATION

PG Diploma – Cyber Security
Great Lakes (2024–25)

B.Tech – Computer Engineering
CGPA 7.8 (2020)

VULNERABILITY MANAGEMENT EXPERIENCE

- Performed vulnerability identification, risk analysis, and remediation tracking across infrastructure, applications, and connected assets.
- Conducted vulnerability triage using CVSS severity, exploitability, and business impact.
- Prepared security reports, remediation recommendations, and risk metrics.
- Collaborated with technology teams to improve security posture and reduce exposure.

SECURITY & REGULATORY KNOWLEDGE

- Vulnerability Management & Risk-Based Remediation
- ISO 27001 Internal Audit & Control Validation
- NIST Cybersecurity Framework
- MITRE ATT&CK Threat Analysis
- Security Governance & Stakeholder Management
